SUBJECT INDEX, VOLUME 20, 1955

Additives, food, toxicological determination of suitability of 215
Agronomic quality and its relationship to chemical composition of peanuts 497
"Alfenthal" (alkyl phenyl phthalate), chronic toxicity studies on 531
Alkyl phenyl phthalate, chronic toxicity study of 531
Antioxidant properties of spices 443
Apple wine, stabilized with glucose oxidase 42
Ascorbic acid values of 34 foods 247

Bacillus coagulans, influence of cationic environments on thermal resistance of 315
Bacillus coagulans var. *Thermoacidurans*, effect of fungicides on thermal death rate of 554
Beef, heat processing of, temperature distribution at high retort temperatures 399
Beef, irradiated, fed to rats and nutritional effects thereof 193
Beef quality, effect of corn, barley, stilbestrol, degree of finish on 521
Beef, round, commercial and prime grades, effect of method of cooking on 160, 171
Beef tenderness, effect of varying storage times and conditions 626
Beef, tenderness, size of shear cores 635
Beef, Western, compared with eastern-fed beef 521
Beet sugar products, nutrient content of 449
Bitter flavor in carrots, spectrophotometric method for estimating 659
Browning, nonenzymic, of green bean purée 149

Cake quality and effect on, of freezing preservation 273, 282
Calcium tolerance of sherry wine, influence of pH and total acidity on 301
Cane sugar products, nutrient content of 449

Carotenoids in the tomato 55
Carotenoids of Valencia orange juice 371
Carrots, bitter flavor in 659
Cathode rays, compared with steam sterilization with respect to nutritional effects of semi-synthetic diet (for mice) 180
Cell walls in plant tissues, effect of cooking on 474
Cheese spread, canned, experimentally inoculated with *Cl. botulinum* 144
Clostridia, effect of sorbic acid on growth of 92
Cl. botulinum, canned cheese spread experimentally inoculated with 144
Cl. botulinum, factors affecting growth and toxin production of, in a precooked frozen food 332, 340
Clostridium parabotulinum, resistance of, to sorbic acid 60
Clostridium pasteurianum, sporulation in 655
Clostridium spores, simplified medium for counting 9
Coffee flavor, brewed, effect of water impurities on 598
Cold sterilization of liquid foods, milk 424
Collagen, fat, nitrogen contents of beef round, commercial and prime grades, as affected by different cooking methods 171
Cooking methods, effect of different methods on beef round of commercial and prime grades 160, 171
Corn, barley, effect of, on beef quality 521
Cuban foods, nutrient composition of 97

Descriptive terms and grading systems in sensory testing 298
Diets, Near East, nutritive value of legume proteins in 31

Effect of braising and saucepan cookery on cooking losses, palatability, nutritive value of proteins of round steak 35
Effect of pH level on pectolytic activity of tomato molds 614
Effect of pH on growth of tomato molds 614
Effect of reduction in bacterial load due to previous exposure to heat during thermal process 226
Eggs, shell, effect of sweating on keeping quality of 221
Enzymatic tenderization of meat 587
Enzyme inactivation and its effect on quality retention in frozen peas 480
Enzymes, respiratory, of meat 322
Equilibrium relative humidity of foods 415
Essential fatty acids, role of, in the diet 81

Factors associated with potato texture 130, 138
Fats, role of, in the diet 81
Flavor judgments, variation in, utilizing group situation 539
Food preference, scale for measuring 512
Freezing preservation and cake quality 273, 282
Freezing preservation, raw vegetables, chemistry of off flavor development 281
Fungistatic agent for foods, sorbic acid as 639

Glucose oxidase as apple wine stabilizer 42
Grape juice, Concord, volatile constituents of 326
Green bean purée, nonenzymic discoloration of 149
Growing conditions, effect of, on yield and vitamin content of turnip greens 575

Heat processing of beef, relationships of temperature, time, space during 377
Heat transfer into open metal thermoresistometer cups 237

Lactic acid bacteria as inhibitors of *Cl. botulinum* growth and toxin production 340

Mangoes, skin coating for, to prolong storage 559
Meat, tenderization of, basic technique and histological observations of enzymatic actions 587
Method for determining equilibrium relative humidity of foods 415

Methods for analyzing vanillin 567
Milk, evaporated, high temperature sterilization of, and relationship to stability 351
Milk, sterilization of, with mercury resonance radiation 424
Monosodium glutamate and taste perception 310

Nutrient composition of Cuban foods (vegetable) 97

Onions, pectolytic activity of extracts from 1
Orange juice, Valencia, carotenoids of 371

Palatability and shear values of two grades of beef round cooked by different methods 160
Pantothenic acids of tropical foods 47
Peanuts, effect of agronomic factors on chemical composition of 497
Peas, frozen, effect of degree of enzyme inactivation on quality 480
Peas, frozen, effect of storage temperature on quality of 480
Peas, Southern, influence of maturity and storage treatment on ascorbic acid content of 469
Pectic substances affecting potato texture 118
Pectolytic activity of extracts of onions 1
Pectolytic activity of tomato molds 614
Phenolic compounds in potato tissue 506
Phytic-acid–treated soybean oil, toxicity for rats 582
Plant tissues, effect of moisture and high temperature on cell walls of 474
Polygalacturonase, action of tomato and avocado 186
Potato texture, physical attributes of 130
Potato texture, specific gravity and starch content of 71
Potato tissue, phenolic compounds in 506
Potatoes, effect of ionizing radiations on 254
Precooked frozen food, used as medium for study of *Cl. botulinum* growth and toxin production 332, 340
Propenyl guaethol and vanillin, characteristics of, methods of analysis for 567
Protection of foods by use of sorbic acid 639
Proteins of egg white and fish, denaturation of, in frozen storage 264
Proteins, legume and legume-wheat mixed, in Near East diets 31
Pulses (legumes) germinated, nutrient contents of 545

Quality retention in peas 480

Radiation, mercury resonance, for cold sterilization of liquid foods 424
Radiation sterilization, growth, survival histopathology of rats fed beef submitted to 193
Radiation sterilization, nutritional adequacy of a diet (for mice) sterilized by steam or by cathode rays 180
Radiations, ionizing, and heat, effect on starch-containing cells of the potato 254
Rating food qualities, terms and point systems for 114
Red pigments formed from 2-thiobarbituric acid 13

Scale for measuring food preference 512
Sensory evaluation of foods, variation in flavor judgments in a group situation 539
Sensory testing, method of choosing judges for 492
Sensory tests, descriptive terms and grading systems for 114, 298
Sherry wine, influence of pH and total acidity on calcium tolerance of 301
Smithfield hams from peanut- and corn-fed hogs, palatability and chemical differences of 548
Sorbic acid as a fungistatic agent for foods, physico-chemical considerations in using 639
Sorbic acid in foods, spectrophotometric determination of 649
Sorbic acid, resistance of *Cl. parabotulinum* to 60
Sorbic metabolism in alloxan—diabetic animals as compared with fructose and glucose 66
Sorbic, propionic, and caproic acids, effect of, on the growth of certain *Clostridia* 92
Spices, antioxidant properties of, in oil-in-water emulsions 443

Sporulation in *Cl. pasteurianum* 655
Stilbestrol and beef quality 521
Storage times and conditions in relationship to tenderness of beef 626
Succinoxidase, beef and pork, temperature stability of 322
Sugar, cane and beet, nutrient content of products of 449
Sulfhydryl groups, liberation of, in frozen storage, from egg white and fish proteins 264
Sweating, effect of, on shell eggs 221
Sweet potatoes, dehydrated, color references for 23

Taste perception, influence of monosodium glutamate on 310
Tenderization of meat, enzymatic basic technique 587
Terms and point systems for rating food qualities 114
Texture, potatoes, pectic substances affecting 118
Thermal death time retorts 606
Thermal process, lethal rates and lethality 226
Thermal resistance of *B. coagulans* 315
Thermal resistance determinations (bacterial spores) in steam using thermal death time retorts 606
Thermoresistometer cups, open metal, heat transfer into 237
2-Thiobarbituric acid, red pigments formed from 13
Tomato and avocado polygalacturonase 186
Tomato molds, effect of pH on growth and pectolytic activity of 614
Tomatoes, carotenoids in 55
Toxicity of physic-acid–treated soybean oil as determined by rat studies 582
Tropical foods, pantothenic acid content of 47
Turnip greens, yield and vitamin content of, as affected by crop, light intensity, soil pH and effects of minor elements 575

Vegetables, raw, frozen, and chemistry of off-flavor development 289
Volatile constituents of Concord grape juice 326

Water impurities, effect of, on brewed coffee flavor 598
